INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/IB2004/003516

Box	k No. I	b. I Basis of the report					
1.		Tith regard to the language , this report is based on the international applicadicated under this item.	tion in the language in which it was filed, unless otherwise				
		This report is based on translations from the original language into the which is the language of a translation furnished for the purposes of: international search (Rule 12.3 and 23.1(b)) publication of the international application (Rule 12.4)	following language,				
		international preliminary examination (Rule 55.2 and/or 55.3)					
2.	rece	the elements of the international application, this report is based on (replacement sheets which have been furnished to the ceiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to is report): the international application as originally filed/furnished the description:					
		pages 11	as originally filed/furnished				
		pages* received	by this Authority on				
		pages* received	by this Authority on				
	\boxtimes	the claims:					
		nos. 1–10	as originally filed/furnished				
		nos.*	as amended (together with any statement) under Article 19				
		nos.* received	by this Authority on				
		nos.* received	by this Authority on				
	\boxtimes	the drawings:					
		sheets 1/3-3/3	as originally filed/furnished				
		sheets* received	by this Authority on				
		sheets* received	by this Authority on				
		a sequence listing and/or any related table(s) – see Supplemental Box	Relating to Sequence Listing.				
3.		The amendments have resulted in the cancellation of:					
		the description, pages					
		the claims, nos.	the claims, nos.				
		the drawings, sheets/figs					
		the sequence listing (specify):					
		any table(s) related to sequence listing (specify):					
4.		This report has been established as if (some of) the amendments and they have been considered to go beyond the disclosure as filed, as indi-					
		the description, pages					
		the claims, nos.					
		the drawings, sheets/figs					
		the sequence listing (specify):					
		any table(s) related to sequence listing (specify):					
*	If ite	item 4 applies, some or all of those sheets may be marked "superseded."					

International application No.
PCT/IB2004/003516

Box			ticle 35(2) with regard to novelty, inventive step or industrial applicability; oporting such statement	
1.	Statement			
	Novelty (N)	Claims	5, 9, 10	YES
		Claims	1-4, 6-8	NO
	Inventive step (IS)	Claims	9-10	YES
		Claims	1-8	NO
	Industrial applicability (IA)	Claims	1-10	YES
		Claims		NO

- 2. Citations and explanations (Rule 70.7)
 - This report makes reference to the following document:
 - D1: DE 92 16 955 U (KRONENBERG MAX), 14 April 1994 (1994-04-14)
 - 2. INDEPENDENT CLAIM 1
 - 2.1 The present application does not meet the requirements of PCT Article 33(1) because the subject matter of claim 1 is not novel (PCT Article 33(2)).

Document D1 discloses (the references in parentheses are to that document):

a connection element (1) for two end zones of box-shaped, hollow spacer profiles (2, 3) in multiple glazings (25), the element comprising a base plate (11) and side walls with elastic retaining elements (13, 15) and a profiled cross-section. In a first zone (13) of each side wall adjoining the base plate, the cross-sectional profile of this

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

zone is designed in such a way that the side wall forms an elastic element that can be deflected in a direction approximately parallel to the surface and normal to the longitudinal axis of the base plate. In a second zone (15) of each side wall which forms the free end zone of the side wall, the cross-sectional profile of this zone is designed in such a way that this zone of the side wall forms another elastic element that can be deflected in a direction at least approximately normal to the surface and to the longitudinal axis of the base plate.

Document D1 thus discloses all the features of claim 1.

3. DEPENDENT CLAIMS 2-8

Claims 2-8 do not contain any features which, in combination with the features of any claim to which they refer, meet the PCT novelty or inventive step requirements because the features of claims 2, 3, 4, 6, 7 and 8, in combination with the features of claim 1, are known from D1, and the material and thickness selection in claim 5 does not involve an inventive step (PCT Article 33(3)).
